

Seminar on XRD in English

Introduction to X-ray Powder Diffraction

For More Information

<https://www.rigaku.co.jp/sangaku/seminar/contact1706e.html>

June. 21, 2017

Information Technology Center, Asano Campus
University of Tokyo

This seminar is intended for international researchers and students who wish to acquire an understanding of crystallography, the principles of X-ray diffraction, and experimental techniques on powder diffraction.

Lecture:

Principles of crystallography, theory and experiment of X-ray diffraction, data processing, data analysis and Rietveld analysis

Enrollment limit: The lecture will be limited to 50 participants.

Lab Courses:

X-ray powder diffraction

Enrollment limit: The lab courses will be limited to 12 participants.

※Invitation period: May. 15 - June. 14 ※Invitation will be closed when it reach the participants limit.

Organized by The University of Tokyo – Rigaku Collaborative Research Center
Advanced Characterization Nanotechnology Platform
